# Hi There & Welcome

Traveling abroad is always exciting. However, sometimes it's fair to miss the comfort and ease of your home comforts - like ordering food, understanding transportation links, talking with locals, and availing of constant WiFi or cell connection.

With these 12 apps, your trip to Greece will be as simple as if you were at home. Included are some apps to help with translation, transportation, travel, currency, and convenience.

Before you fly, make sure you have these apps installed on your device to make this trip to Greece the best it can be!

## Google Maps Maps & Directions

Whether you're one to venture off onto some unmarked path or one who sticks to the road, you are bound to get lost at least once. An app you likely already have on your phone, Google Maps, can lead you to your next destination, whether by foot, car, or train.

If you don't have data or if you think your data will be spotty, offline maps will help you know where you are going and for those who may be a bit directionally challenged, they come to save the day. Another helpful tip for Google Maps is marking your hotel, hostel, or Airbnb as a favorite on your phone so you don't have to type out the full address every time, rather type in "Hotel" or "Airbnb" and your phone will show you the best way to get there.

# Athens Travel Guide

## Seeing the Sites & Getting Around on the Subway

You can carry city tour guides on your phone instead of carrying a physical guidebook. You'll get an in-depth guide to the best spots in the city. [The app includes an interactive offline map and GPS functionality.](#) The app highlights attractions such as the Acropolis, Parthenon, Temple of Athena Nike, Erechtheum, Acropolis Museum, and Temple of Poseidon.

# OASA Telematics

## Getting Around by Bus

If you want to take the bus in Athens then download the OASA Telematics app. You can hop on a bus in a flash. The app also updates with your location and will direct you to the nearest station.

Be advised you have to purchase bus tickets before getting on the bus. You can purchase tickets at any metro station and designated kiosks.

Available:  Apple

 Android

# B Beat Taxi App

Beat is similar to Uber, but it works with local taxis. As with Uber, it allows users to input their pick-up and drop-off locations. Drivers are rated, so you can choose one with a good rating before they arrive at your location. When requested, you can also get an estimated price to see how much the taxi will cost. Be sure to ask the driver to start the meter so you will not be charged a flat rate.

You can connect Beat to your credit card but some drivers don't take credit cards so make sure to have some cash.

# G Google Translate Communicating with the Locals

Although the Greeks speak English, you still need an app to help translate for Grecians who don't speak English. Google Translate also includes a camera that will translate handwriting, street signs, text, etc. You just align your phone up to the text and the app will provide a rough translation from Greek to English. Just have a photo?

Highlight the words on the photo and draw in the letters as if it's a piece of paper and the conversation and voice features allow it to translate using words spoken into the microphone of your device.
